Project

Automated Short Answers Assessment (JavaScript, HTML, CSS, Python)(2023)

-- A web-app that using DL models to help educator grade others answer.
I am the leader of this 6 members group for this project and mainly developed the front-end part using React in JS and halfway of back-end using flask in python.

Personal Web and Video Server (HTML, C) (2023)

-- A personal web that using the HTTP and TCP, also showing of how to implement a concurrent server that can handle multiple clients simultaneously. I helped my group leader to finish part of implementation of HTTP/1.0 and part of auth token.

Poster of festival (JavaScript, HTML, CSS) (2022)

-- A simple holiday poster can be presented on both mobile and computer sites through a combination of different images and gifs.

Payment Screen for Phone (JavaScript, HTML, CSS) (2022)

-- A simple imitation of a mobile payment page, with bank card information including card number, expiration date, and CVV.

Card Game (Java) (2021)

-- A card game written in java. Using shape, window, bottom etc. to design the UI.

Activities and Honor

Member of the Dream Corp of Virginia Tech (2021 - 2023)

-- A charity organization that I joined while in college, whose purpose is to help and serve the community. Mainly participated in helping Roanoke homeless people to get food and supplies.

Member of the Basketball Club Team of Virginia Tech (2021 - 2023)

-- The basketball club I joined during my college years and participated in the NECBL basketball tournament.
